

Remote EEG Monitoring Services With a 1:4 Tech-to-Patient Ratio

**AFFORDABLE, REAL-TIME, REMOTE, EEG MONITORING
TO MEET THE 2020 CPT CODES FOR LONG TERM EEG**

Definitions of Continuous, Intermittent, or No Monitoring of long-term EEG have recently been published by CMS as part of the 2020 CPT Codes. Based on recommendations from epileptologists and neurophysiologists, the new guidelines create the need to evaluate how EEG monitoring is currently accomplished and consider options to improve patient care and address risk management concerns.

1:4 is the Standard for Continuous Monitoring

Though previously recommended, the 2020 CPT Codes for Long Term EEG Monitoring clearly state that to qualify for procedures that include continuous monitoring, an EEG technologist cannot monitor more than 4 patients simultaneously and any significant interruption in monitoring, or adding a 5th patient, automatically converts all patient procedures to “intermittent monitoring”, requiring the application of a different CPT code, with a lower reimbursement.

When CortiCare is your EEG Services provider, one call can have us monitoring your patients within 20 minutes, ensuring that the requirements for Continuous Monitoring are met.

CortiCare® provides EEG monitoring services for hospital Critical Care Units, Neonatal ICUs and Epilepsy Monitoring Units. Whether you need full-time or gap coverage, CortiCare has the resources to support your staff and meet the new guidelines for EEG monitoring with affordable solutions.

BRAIN MONITORING SERVICES MADE EASY - ANYWHERE, ANYTIME

CortiCare cEEG Capabilities

CONTINUOUS MONITORING 24/7 OR GAP COVERAGE

- 60+, experienced, Registered EEG Technologists, on our staff, many with CLTM
- Available within 15 minutes to log on and monitor patients
- We maintain a tech-to-patient ratio of no greater than 1:4
- Techs annotate the EEG study per ASET, ACNS and CMS requirements
- Communication protocols that meet your needs

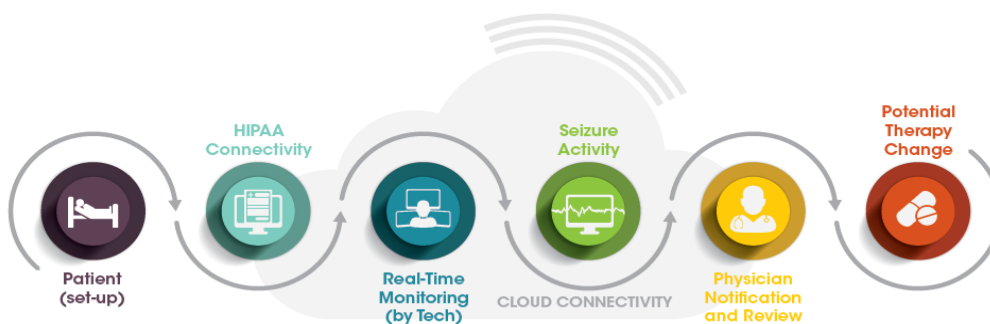

SECURE, REMOTE ACCESS TO YOUR EEG SYSTEMS

- Remote Access Solutions that support HIPAA & HITECH compliance
- We work with your IT Staff to implement a reliable, robust remote access package
- Security measures that include one-time passcodes, whitelisting, full AES encryption and audit records of system access

NEUROPHYSIOLOGIST READING AND REPORTING

- A network of more than 40 board certified neurophysiologists and epileptologists are available to optionally support any needs for professional reading of the EEG
- EEG reading and reports at least every 12 hours direct to the patient EMR
- Reporting follows and meets ACNS standards
