CortiCare
Total EEG Solutions

When you require a **solution** to deliver **complete EEG services**, **CortiCare** is the answer

PROVIDE 24/7 SERVICES

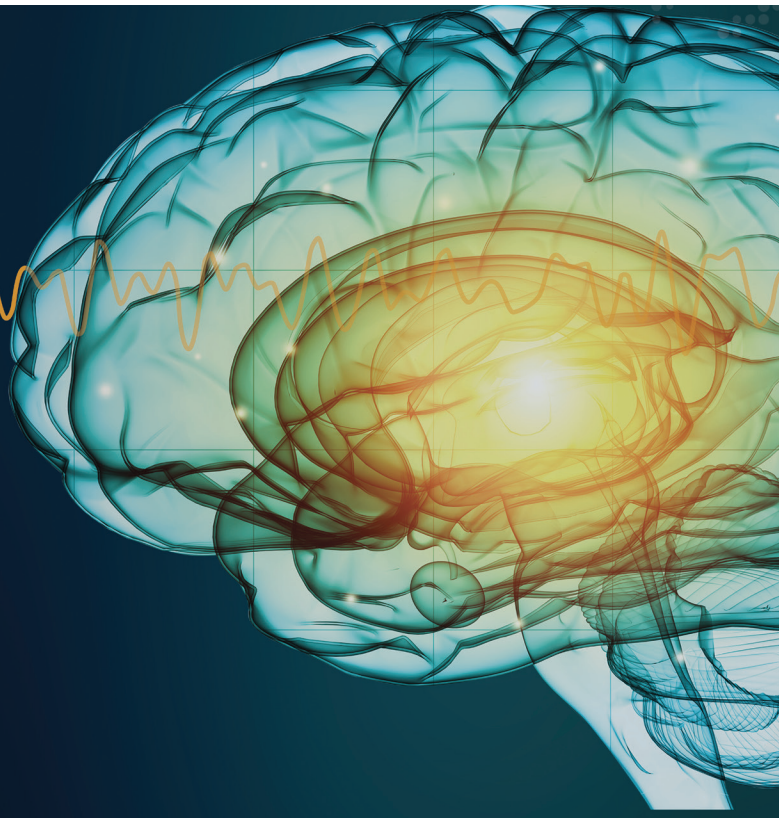
No need to limit patient services due to lack of resources – CortiCare has you covered.

IMPROVE PATIENT CARE

Timely EEG studies and long-term monitoring of neurological function lead to better clinical decisions and treatment pathways.

REDUCE COSTS

Decrease total cost of care by appropriately evaluating and treating patients with neurological disorders or complications. Retain patients that would otherwise need to be transferred to other facilities.



Technologists
- Setup Techs
- Routine Tests

cEEG Monitoring
- 24/7
- Gap Coverage
- 1:4 Tech: Patient Ratio

Ambulatory Video EEG
- In-Home
- In-Office
- Monitored

Equipment
- 8 Channel STAT EEG
- 32 Channel Video EEG

Physician Reading
- On Call for STAT and cEEG
- Routine Reads

CortiCare
The New Wave of EEG Services

CortiCare, a Leading Provider of EEG Solutions

TRAINED STAFF

CortiCare EEG technologists are trained and experienced. We have the largest staff of Registered EEG Technologists with CLTM certification of any company.

CURRENT TECHNOLOGY

We work with you to incorporate the latest technology in EEG testing systems, including the leading vendors such as Natus, Nihon-Kohden, Cadwell, Neurosoft and Compumedics.

EEG READERS

Our physicians are licensed, board-certified neurophysiologists and epileptologists, experienced in reading adult, pediatric and neonatal EEG studies.

CortiCare was the first and remains the largest Tele-EEG Service company in the US. With over 60 Registered EEG Technologists on our nationwide team and more than 55 board-certified neurophysiologists, CortiCare is dedicated to improving neuro-patient care.

Started in 2012, CortiCare provided cEEG monitoring in Adult, Pediatric and Neonatal Intensive Care Units in facilities nationwide, adding physician reading services in 2015.

CortiCare expanded its services in 2018 to provide in-home ambulatory Video-EEG studies and inpatient routine EEG and EEG setups for continuous EEG monitoring.

We work with facilities to ensure that the EEG equipment and supporting infrastructure are available and functional to deliver the needed EEG related services.

Security Taken Seriously

- Remote connectivity solutions that comply with HIPAA, HITECH and HITRUST requirements.
- All staff trained and certified on HIPAA standards.
- We work with the facility IT department to implement secure access to monitored EEG systems and your EMR.

Our Pledge:

To provide reliable, affordable and accessible real-time EEG solutions to patients and healthcare facilities *anytime*, *anywhere*.

> “From the ICU and NICU to the ED and EMU, CortiCare offers the largest nationwide network of remote EEG monitoring and reading services for long-term, STAT and routine EEG studies.”

Brain Monitoring Services Made Easy—*Anytime, Anywhere*
