

# CortiCare

## NEW EEG SOLUTIONS for NEW CHALLENGES

In response to the **COVID-19** pandemic CortiCare can offer alternative paths to provide needed EEG services

Consider New Approaches to provide complete EEG services for your patients

## CORONAVIRUS

- Inpatient cEEG – outsource remote monitoring
- Outpatient EEG – shift to home-based testing
- EMU – shift to monitored home video-EEG

When you require a solution to deliver complete EEG services, **CortiCare** is the answer

### EEG Service Offerings

#### Technologists

- Setup Techs
- Routine Tests

#### cEEG Monitoring

- 24/7
- Gap Coverage
- 1:4 Tech: Patient Ratio

#### Ambulatory Video EEG

- In-Home
- In-Office
- Monitored

#### Equipment

- 8 Channel STAT EEG
- 32 Channel Video EEG

#### Physician Reading

- On Call for STAT and cEEG
- Routine Reads

# CortiCare, a Leading Provider of EEG Solutions

## Trained Staff

CortiCare EEG technologists are trained and experienced. We have the largest staff of Registered EEG Technologists with CLTM certification of any company.

## Latest EEG Technology

We work with you to incorporate the latest technology in EEG testing systems, including the leading vendors such as Natus, Nihon-Kohden, Cadwell, Neurosoft and Compumedics.

## EEG Readers

Our physicians are licensed, board-certified neurophysiologists and epileptologists, experienced in reading adult, pediatric and neonatal EEG studies.

## Our Pledge:

To provide reliable, affordable and accessible real-time EEG solutions to patients and healthcare facilities *anytime, anywhere.*

# New Solutions for New Challenges

Adjusting for the challenges of providing healthcare in a time of global stress may require a new approach to delivery of services. Patients still need to be evaluated for neurological disorders and assessment of treatment efficacy. CortiCare is uniquely able to provide services as an adjunct to your resources that may be stretched or even reassigned over the next year.

## There are several solutions that CortiCare can provide:

### • Inpatient cEEG Monitoring in Critical Care

As critical care patient admissions increase, a significant number will involve altered mental status with some experiencing non-convulsive seizures that require cEEG monitoring to detect and manage. CortiCare has the capacity to monitor all your patients remotely, freeing up your staff for other duties. Consider outsourcing cEEG monitoring.

### • Outpatient Diagnostic EEG Studies

The restrictions that are or will be placed on outpatient departments, may mean limiting or delaying routine diagnostic EEG testing. CortiCare can provide this service in the patient's home in many areas of the country. We can record the EEG and provide a study that is report ready, or have our physicians generate the report.

### • Epilepsy Monitoring Units – Consider home-based, remotely monitored Video-EEG

If patient assessment cannot be postponed, consider evaluation of the patient with an extended, monitored video-EEG study in their home. CortiCare can monitor intermittently or continuously, with physician access to the study anytime. No limit on the number of recording days.

Contact us to discuss how we can develop solutions to address your and your patients needs during this challenging period.
