EEG Reading & Consulting Services

Flexible Solutions for Your System's Needs

EEG Reading and Consulting Solutions

Your patients need and your staff is requesting more EEG studies (electroencephalograms) especially in the ED and ICU. However the demands for reading the studies exceed the capacity of your staff neurologists.

That's where CortiCare's Nationwide Neurophysiologist Network can provide solutions to address today's healthcare demands. Our network of specialists covers most states in the U.S. and our support staff is

ready to assist with your credentialing process to deliver a solution as quick as possible.

Our services, provided by licensed, board-certified neurophysiologists and epileptologists are available when you need them, whether for a STAT EEG in the ED, a routine EEG study on the floor or in the clinic, or in a long-term continuous EEG study in the ICU or EMU.

EEG Reading

Get the on-demand specialist support for your patients who need neurologic evaluations with EEG. Whether you need a STAT response or a scheduled study, our network of neurophysiologists is ready to efficiently review and report per the standards set by the American Clinical Neurophysiology Society.

EEG Consultation

If needed, we can be contracted to provide limited scope consultations for seizure management, with experts in adult, pediatric and neonatal neurophysiology.

Secure Remote Access to EEGs and EMR

We work with your IT department to implement secure remote access to your EMR and, if needed, directly to the EEG systems to review real-time data. All remote connections meet HIPAA, HITECH and HITRUST requirements.

CortiCare Nationwide Neurophysiologist Network

The CortiCare Advantage	With STAT and 24/7 Coverage	Non-STAT Coverage
Reporting through the facility EMR system	●	●
Comprehensive written reports	●	●
Secure, remote access platform	●	●
Malpractice insurance coverage	●	●
Scheduled specialist coverage	●	●
STAT EEG and cEEG review and reporting	●	●
24/7 access to licensed neurophysiologists	●	●

BROAD BENEFITS TO YOU

Improve Patient Care

Access diagnostic EEG services to manage your patients' condition in a timely manner

Save Money

Lower costs with contracted services used only when needed

Retain Patients

Reduce patient transfers due to the lack of needed services

Address Physician Burnout

Support your staff with resources that can reduce stress

CortiCare's Matrix of Inpatient and Outpatient EEG Solutions

Our Nationwide Neurophysiologist Network is only one of the comprehensive EEG related services CortiCare offers to improve patient care.

CortiCare is a leading provider of remote cEEG Monitoring and in-home ambulatory EEG and routine EEG studies as well.
