

Ambulatory Video EEG With Intermittent Monitoring

“

"CortiCare's in-home EEG services are outstanding. The studies are of excellent quality, and the technologist impressions are well-written and efficient. CortiCare's commitment to excellence in patient care is second to none."

Neurologist, Major Northeast Neurology Practice

300+

Registered EEG techs

48 Hrs

Report turnaround time

12+

Years supporting EEG programs at scale

Grow Your EEG Program Without Expanding Your Staff

You Retain Clinical Control. CortiCare Manages the Execution.

HOW IT WORKS

- 01** Neurologist determines the need for long-term ambulatory EEG
- 02** You order & set up in-office using existing clinical staff & our Duo HD Conversion Kit for your Natus Trex System
- 03** Patient goes home with locked, tamper-proof equipment
- 04** Registered EEG technologists monitor the study remotely
- 05** Patient returns to your office for equipment removal
- 06** CortiCare analyzes the study & sends report within 48hrs
- 07** You retain clinical control, review the results, & bill directly

WHAT MAKES IT RELIABLE

- EMU-quality studies, built on consistent protocols aligned to ACNS guidelines
- Full-montage recording, reviewed in Persyst by registered EEG technologists
- Structured escalation protocols and 24/7 patient support
- Secure remote EEG data server access and storage

WHAT NEURO PRACTICES TELL US

"We don't have the staff or workflow to add EEG in-house"

"We're not sure EEG pays for itself as a service line"

"We're not confident in remote monitoring quality"

WITH CORTICARE

→ In-office setup using existing clinical staff. EEG training available

→ New reimbursement opportunity with minimal added overhead

→ Registered technologists, ACNS-aligned protocols, you retain full interpretation control

**Grow your EEG program
without growing your headcount**
