CortiCare®

Virtual EEG Monitoring & Interpretation

Robust EEG solutions to enable hospitals and health systems to intervene and treat epilepsy, brain diseases and disorders.

"Your loved one had a seizure yesterday in the ICU. The good news is we intervened and stopped them from recurring."

This is the conversation you can have when CortiCare is monitoring your patients.

WHAT WE DO

Inpatient Continuous EEG Monitoring

- 24/7 EEG coverage in the ICU, NICU, PICU, and EMU
- No gaps, ever - nights, weekends, holidays
- Monitoring within 10 minutes, alerts within 180 seconds

Physician Reading & Consulting

- EEG interpretation when internal coverage isn't available
- On-demand 24/7 Routine, Stat and LTM EEG reading support
- Escalation support & seizure consults for high-risk patients and events

Ambulatory EEG

- Keep patients within your system of care
- Intermittently monitored studies for outpatient care
- Full EEG report within 48 hours of completion

THE CORTICARE DIFFERENCE

WHAT HOSPITALS TELL US		WITH CORTICARE
"We struggle with overnight EEG coverage"	→	Now it's covered
"We're holding patients longer than we'd like as we wait for interpretation"	→	Now we discharge appropriately
"We transfer patients out for lack of resources"	→	Now we keep more patients local

Find out what your EEG coverage is really missing.
